

NOVANDI RAMADHAN

Jl. Ki Uju, Kota Serang, Banten | (62) 8515-6066-785 | novandiramadhan80@gmail.com | novandi18.github.io

I am a Software Developer and Offensive Security Consultant with a degree in Informatics Engineering from Universitas Serang Raya. I have experience in Web Development using React, Laravel, and Node.js; Android Development using Kotlin and Jetpack Compose; Low-Code/Rapid Development using Mendix and Java; and Vulnerability Assessment and Penetration Testing (VAPT) for client environments. I am skilled in building user-focused digital solutions, conducting security assessments, identifying vulnerabilities, validating exploitation risks, and preparing professional security reports with clear remediation recommendations.

EDUCATION

Informatics Engineering | Universitas Serang Raya

2020 – 2024

GPA: 3.83

Software Engineering (RPL) | SMK Informatika Kota Serang

2017 - 2020

EXPERIENCE

Offensive Consultant | PT DefendIT360

February 2026 – Present

- Conduct authorized Vulnerability Assessment and Penetration Testing (VAPT) engagements for client environments, covering web applications, infrastructure, internal networks, exposed services, and security misconfigurations.
- Perform reconnaissance, vulnerability scanning, enumeration, exploitation validation, and risk analysis using tools such as *Nmap*, *Nessus*, *Nuclei*, *Burp Suite*, *Hydra*, *CrackMapExec*, *Metasploit*, and *sqlmap*.
- Prepare professional penetration testing reports with executive summaries, technical findings, CVSS-based severity ratings, evidence, business impact analysis, and remediation recommendations.
- Developed internal cybersecurity platforms, including *Securi Report* for pentest report management and AI-assisted report generation, and *Securi Leak* for authorized credential leak analysis, large-scale dataset search, RBAC, audit logging, and export workflows.

External Reviewer Android Developer | Dicoding Indonesia

November 2025 – Present

- Evaluated and reviewed Android application projects submitted by students, ensuring compliance with strict technical requirements and rubric standards.
- Identified bugs and potential edge cases in student submissions, providing detailed reproduction steps and technical solutions.

Low Code Developer | PT. Bank Negara Indonesia (Persero) Tbk via PT. Suwadharma Duta Data

June 2025 – December 2025

- Developed and maintained critical internal business applications using the Mendix low-code platform and custom Java actions to support core banking operations.
- Performed routine maintenance, troubleshooting, and performance optimization on existing applications to ensure high availability and system reliability.
- Collaborated with business analysts and stakeholders to gather requirements and translate them into efficient, user friendly technical solutions.

Mobile Development | Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

February 2023 – July 2023

- Developed a feature-rich food recipe application, implementing API calls with Retrofit for data fetching and local data persistence using the Room database.
- Engineered a story-sharing application, utilizing Paging 3 for efficient, paginated data loading and display.
- Build a Premier League Matchday app using Jetpack Compose.
- Build a Capstone Project app, Journey: Job and Empowerment for Disability. The Journey project aimed to develop a mobile application that addresses the challenges faced by people with disabilities in accessing suitable job opportunities in Indonesia. The project commenced on May 15, 2023, and was successfully completed on June 16, 2023.

Junior Programmer | PT. Juhdi Sakti Engineering

June 2019 - August 2019

- Engineered a comprehensive Employee Payroll Management system from the ground up using the Laravel framework.
- Designed and implemented key features including automated salary calculation, employee data management, and report generation.

SKILLS

Programming Language: Kotlin, Java, Python, PHP, TypeScript, JavaScript.

Mobile Development: Android Native (XML), Jetpack Compose, Material Design, Android Jetpack (ViewModel, LiveData, Navigation Component), Kotlin Coroutines & Flow, RxJava, Retrofit, Room, DataStore, Dagger Hilt, Koin, Glide, CameraX, Kotlin Multiplatform (KMP).

Web Development: Node.js (Express.js, NestJS), Python (Flask), PHP (Laravel, CodeIgniter), RESTful APIs, RabbitMQ, Swagger, JWT, OAuth2, Docker, Next.js.

Databases: MySQL, SQLite, Firebase, MongoDB, Oracle.

Cloud, DevOps & Version Control: Google Cloud Platform (GCP), Git, GitLab, Jenkins, Red Hat Openshift.

Architecture & Design: Clean Architecture, Multi-Module Architecture, Model-View-ViewModel, Model-View-Controller, UML, ERD.

Testing: JUnit, Espresso, MockK.

Machine Learning: K-Nearest Neighbors (KNN), Recurrent Neural Networks (RNN), Content-Based Filtering.

Tools & Software: Figma, CorelDRAW, Photoshop, Affinity Designer, Postman, Microsoft Office.

Cybersecurity: VAPT, Web Application Security Testing, Network Penetration Testing, Infrastructure Security Assessment, Reconnaissance & Enumeration, Vulnerability Scanning, Exploitation Validation, Post-Exploitation Analysis, CVSS 4.0 Risk Scoring, Security Reporting, SIEM Fundamentals.

Security Tools: Nmap, Nessus, Nuclei, Burp Suite, OWASP ZAP, Dirsearch, Feroxbuster, Hydra, CrackMapExec, Metasploit, sqlmap, Gobuster, Nikto.

Security Standards & Frameworks: OWASP Top 10, OWASP Web Security Testing Guide, CVSS 4.0, NIST SP 800-115.

CERTIFICATES

Certified Artificial Intelligence Security & Risk (CAISR) | Red Team Leaders

2026

Assessment of Security Architecture, Governance, Risk Management, and Defensive Practices Across the AI System Lifecycle

Certified Blue Team Practitioner (CBTP) | The SecOps Group

2026

This certification validates technical proficiency in defensive security operations and infrastructure hardening. It focuses on the practical application of security monitoring, log analysis, and threat detection within a Security Operations Center (SOC) framework.

Certified Red Team Operations Management (CRTOM) | Red Team Leaders

2025

Validated expertise in focuses on governing and managing threat-led red team programs, emphasizing risk alignment, operational safety, and performance metrics.

Certified Network Security Practitioner (CNSP) | The SecOps Group

2025

Validated expertise in securing network infrastructure by identifying vulnerabilities, analyzing traffic, and implementing robust defensive measures against cyber threats.

Google Cybersecurity Professional | Google on Coursera

2025

Completed a professional training program focused on cybersecurity fundamentals, threat analysis, network defense, SIEM tools, and Python automation.

Certified Cybersecurity Educator Professional (CCEP) | CourseStack

2025

Validates expertise in delivering advanced cybersecurity training and education across architecture, cloud, identity, application, operations, and incident response domains.

Associate Android Developer | Google

2025

Successfully passed all the certification process, which involves a comprehensive assessment encompassing project submission and exit interview.

Google Play Store Listing | Google Play Academy

2024

Validated expertise in optimizing store assets, metadata, and policy compliance to maximize app discoverability on Google Play.

Menjadi Android Developer Expert | Dicoding Indonesia

2023

Mastered advanced Android principles including Clean Architecture, Reactive Programming, Dependency Injection, and Modularization.

TOEFL Paper Based Test | English New Access (ENA)

2023

Achieved a TOEFL PBT score of 470, demonstrating professional working proficiency in English.

ACHIEVEMENTS

Web Design Contest | Universitas Islam As-Syafi'iyah

2020

Secured 2nd place in a university-level web design competition by developing a visually compelling and user-friendly website prototype.

Google Code In | Google, Inc

2019

Selected as a participant in the Google Code-in program, successfully contributing code, documentation, and bug fixes to 3 distinct open-source projects.
